DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims **1-4**, drawn to a method for carrying out marketing used in determining future demand based on different prices, classified in class 705, subclass 10.
 - II. Claims **5-7**, drawn to a method for selecting and displaying a fixed number of items for purchase, classified in class 705, subclass 27.
 - III. Claims **8-10**, drawn to a device for storing and updating price information in a history data storage, classified in class 705, subclass 20.
 - IV. Claims **11-13**, drawn to a method for calculating a price for items using weight vectors, classified in class 705, subclass 400.

The inventions are distinct, each from the other because of the following reasons:

1. Inventions I, II, III, and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as determining demand for a product using marketing data. Invention II has separate utility such as displaying a plurality of items for sale and allowing one to select from the items. Invention III has separate utility such as storing marketing history data and updating prices based on history data. Invention IV has separate utility such as setting prices of items based upon updated calculated prices. See MPEP § 806.05(d).

Art Unit: 3639

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
